Div. of Oil, Gas & Mining

Dear Mr. Havenstrite:

On October 15, 2009, the Bureau of Land Management (BLM) Salt Lake Field Office received your proposed modification to the Plan of Operations for the Cactus Millsite serialized U-73999. This document was originally submitted to the Utah Division of Oil, Gas and Mining (UDOGM) as a Notice of Intention to Amend Large Mining Operations (UDOGM permit M/045/049).

The BLM subsequently requested additional information from you to be able to consider your Plan complete. On March 4, 2010, we received a portion of the information requested, however, your application is still considered to be incomplete.

Before we can accept your Plan Amendment as complete, you must provide this office with the additional information required by 43 CFR 3809.401:

- 1) As part of your description of operations, please describe your rock processing activities including crushing equipment and facilities and a flow sheet of your processing circuit [§3809.401(b)(2)(ii)]. Also indicate the location where these operations will take place.
- 2) A groundwater monitoring and reporting plan as required by Utah Department of Environmental Quality.
- 3) A stormwater plan with watershed calculations, hydrologic designs, and peak flow analysis as requested by UDOGM.
- 4) Your March 4, 2010 response states that the "operation will be a 24/7 operation with no seasonal shutdowns". Please incorporate this statement into the text of your Plan Amendment.
- 5) As discussed in our March 24, 2010 meeting, please state in your Plan Amendment that you plan to demolish and remove all structures from the site at the end of operations. Include this as part of your revised reclamation cost estimate.

- 6) Please provide a description and location of on-site water storage facilities.
- 7) As part of your plan, please provide a table of all chemicals, reagents and hazardous materials to be stored on site including the ones in listed in Appendix 7. Also describe your plans for the safe handling and storage of these materials.
- 8) The Plan Amendment must describe your spill contingency plan [§3809.401(b)(2)(vi)]. For example, describe how you will deal with a release of acid forming, toxic, or hazardous materials (i.e. leachate solution) into the environment, and what measures you will take to prevent such a release.
- 9) A rock handling plan that provides details of how you will transport ore from the Yellow Hammer Mine, including method of transport, dust suppression, traffic safety, etc. [§3809.401(b)(2)(iv)].
- 10) In order to show that the proposed uses and activities will prevent or avoid unnecessary or undue degradation, you must show that they will conform to all applicable federal and state environmental standards by obtaining all required permits and authorizations and meeting the standards required by state and federal law.

In accordance with §3809.412, you are not authorized to engage in any of the activities described in your Plan Amendment until this office determines that it is complete, you provide the financial guarantee required under §3809.552, and BLM notifies you that you may begin operations.

Please submit the requested information within 60 days of receipt of this letter. If we do not receive the requested information from you, we will consider your Plan Amendment to be withdrawn.

If you have any questions, or require additional information, please contact Stephen Allen of my staff at (801) 977-4360.

Sincerely,

Michael G. Nelson
Assistant Field Manager,
Nonrenewable Resources
